Sinarscour SWH

(SCOURING AGENT)

Technical Data Sheet

Version : 13032023-1.1

Storage and Lifetime

- ◆ When storage correctly in sealed containers has a self life to 12 months.
- ◆ The product should be protected from direct light.
- ◆ Packaging in an 125 Kg plastic drum.

Application

SINARCLEAN SWH has a dispersing effect and prevents disturbances caused by preparation residues and the formation of dyestuff agglomerations. Soiling of the dyeing machine is thus prevented.

Cleaning of marks and stains on the fabric :

SINARCLEAN SWH : 0.1 – 5.0%

Temperature : 100°C

Time : 30 – 60 minutes, wash and dry.

All the information is based on our knowledge and experience. This is being provided for guidelines without obligations. Customer are encouraged to carry out trials at their end. All standard safety precaution applicable should be followed while handling as with all other dyes and chemicals.
